

Algebra 1 – Q3.1_3.3 A

Name: _____

3.1 – One-Step Equations

Solve each equation. Show your work.

1. $x - 12 = -5$

2. $-7r = 35$

3. $\frac{m}{-3} = 9$

3.2 – Two-Step Equations

Solve each equation for the variable.

4. $2p + 7 = 25$

5. $-4k - 3 = 9$

6. $\frac{1}{2}y - 5 = 3$

7. $0.3a + 2.4 = 5.4$

3.3 – Multi-Step Equations

Simplify and solve each equation.

8. $4n + 6 - 2n = 18$

9. $3(2x + 5) - 9x = -3$

10. $2(3y - 4) + y = 13$

Real-World Problem

11. A rideshare company charges \$4 to start a trip and \$2.50 per mile.
If your total cost was \$29, how many miles did you travel?
