

Algebra 1 – Q3.1_3.3 C

Name: _____

3.1 – One-Step Equations

Solve each equation. Show your work.

1. $s - 15 = 4$

2. $-9w = 63$

3. $\frac{p}{6} = -5$

3.2 – Two-Step Equations

Solve each equation for the variable.

4. $3k + 4 = 19$

5. $-2m - 7 = 9$

6. $\frac{1}{4}x + 6 = 11$

7. $0.5y - 1.5 = 2.5$

3.3 – Multi-Step Equations

Simplify and solve each equation.

8. $6a + 10 - 2a = 22$

9. $2(3r - 5) - 8r = -10$

10. $4(t + 2) - 3t = 9$

Real-World Problem

11. A bowling alley charges \$12 per person plus a one-time lane fee of \$18.
If your group's total was \$78, how many people bowled?
